SECTION TWO

BACKGROUND AND SCOPE OF WORK

2.1 BACKGROUND

The DOW is a water utility whose mission is to provide safe, affordable, sufficient drinking water through wise management of our resources with excellent customer service for the people of Kauaʻi.

The DOW is a semi-autonomous agency of the County of Kauaʻi. Revenue from water sales is the main source of income that finances its operations. There are 9 water systems that supply approximately 22,000 accounts. These accounts were maintained through the Honolulu Board of Water Supply (HBWS)'s Customer Accounting System (CAS) which was later converted in 2013 to Customer Care & Billing System (CC&B).

On October, 2016, the DOW converted from the HBWS' CC&B hosted environment to its own instance of CC&B using oracle V2.5 database. The conversion from HBWS' hosted environment to DOW's own CC&B environment created a huge impact on personnel to the DOW. The daily monitoring, maintenance and support is beyond the capabilities of the limited IT staff of the DOW.

The DOW finds that the need for a CC&B hosted solution is critical to the DOW's operations to ensure that the system is functioning reliably while allowing its own IT staff to focus on the day to day operations of the department.

The DOW will continue to maintain its own CC&B license while the successful vendor will be responsible for the overall reliability of the CC&B system. The services must include but not limited to the daily, monthly, and annual maintenance of the CC&B system. It must also include regular updates and upgrades as required of the software program.

2.2 SCOPE OF WORK

All Services shall be in accordance with this Request for Proposal (RFP), including its attachments and any addenda.

2.2.1 Provide Hosting of DOW's Oracle database and CC&B Application.

- i. Provide and manage DOW cloud hosting solutions that includes servers, operating systems, storage, backups, networking, and security.

2.2.2 Provide ongoing support to the DOW staff during normal office hours. Functional and Technical Support for CC&B business processes, customization, consulting and database administration includes but is not limited to the following:

- i. Daily batch processing, daily back up of the system.
- ii. Errors and problems arising from manual or automated reports.

- iii. Assist with administrative control functions.
- iv. Bill factor rate changes as needed.
- v. Report generation; Daily/Monthly/Annual reporting
- vi. Apply fixes & patches and future updates and upgrades within the contract period.
- vii. Answer questions, troubleshoot, and resolve issues.

In addition, the successful vendor must be able to work with other DOW outside service providers for services such as.

- 1. Bill processing and mailings.
- 2. Online Payments such as ACH or credit card third party providers.
- 3. Bank institutions.
- 4. Auditors.

The successful vendor must established a desk help center available during normal office hours from 7:30 a.m. to 4:45 p.m. Hawaii Standard Time (HST) for any functional and technical support when the needs arises.

- 2.2.3. As needed customized solutions.
 - i. Modify existing or create new CC&B reports.

2.2.4. Payment Options

- 1. An interactive voice Response (IVR) service
- 2. A Payment APP (Apple and Android Based Device)
- 3. Online Customer Service Portal – Debit and Credit Card Payments

The selected vendor should propose any additional payment options that are customer friendly, such as PayPal, etc.

Discovery Session & Statement of Work (SOW)

The vendor will conduct its initial discovery of the CC&B application and hosting requirements and must provide a statement of work and a firm Implementation Plan Proposal to the DOW. Provide a narrative of the vendor’s methodology and approach to perform the conversion of the hosting solution from its current location to the new hosting solution and develop a cost saving analysis proposal which may involve business process assessment, data integration and population, implementation, testing, training documentation, and ongoing support and maintenance.

Vendor shall provide this section in the form of a Statement of Work. In the cost section of this RFP, the vendor will be required to provide a fixed cost for this scope of work.

Implementation Plan

The vendor will develop an Implementation Plan for initial set-up, data transfer, and on-going maintenance of the software and/or products and services that addresses all tasks and proposed deliverables identified in this Section requirements.

Vendor shall provide this section in the form of a Narrative outlining vendor’s methodology, approach, resource requirement, and risks. In the cost section of this RFP, the vendor will be required to provide a budgetary cost for this plan at this time. A firm cost will be required after the Discovery Session is completed.

The following section outlines the minimum scope of what should be covered in the requested narrative: The CC&B Hosted Solution Work Plan & Approach. The selected vendor must provide project support with the DOW's implementation team in successfully implementing the hosted solution. The DOW's implementation team will consist of staff from the DOW including Information Technology, Billing, and Accounting. The selected vendor will be required to assign a project manager to this project. The selected vendor and the assigned project manager will be required to manage the project resources to ensure the requirements of this RFP and the resulting contract are satisfied. Vendors must propose an effective and sufficiently formalized approach that allows for the anticipation of problems, potential delays, and the formulation and execution of appropriate corrective action.

CC&B License

The Department will hold on to its current CC&B License and will renew directly with Oracle or applicable reseller

Data Integration and Population

The selected vendor will need to import Kauai DOW's current CC&B data from its current location to the new CC&B hosted environment and must verify that all information is accurately transferred over to the new-hosted system. The selected vendor will also work with the Department to ensure that only DOW data will be integrated and populated to its own designated DOW CC&B database and any data that does not belong to the DOW must be isolated and removed.

Installation

The selected vendor will work with the DOW's Information Technology staff to install a secure connection and setup all software components and configure the database and server as necessary to support the software during testing and when the system goes live. Any required configuration, customization, and development of current customized reports for the DOW to support the functional and technical requirements presented in the system requirements must be included in the services to be provided during the implementation.

System Testing

The selected vendor will work with the DOW's implementation team to develop a test plan to determine if the system meets all functional and technical requirements. Testing will be conducted for all standard functionality provided in the DOW's current configuration. Testing will be performed by the DOW's staff. The system will not go "live" until system testing is completed and the DOW's staff is satisfied that all issues identified during the testing process are resolved.

Documentation

The selected vendor, upon successful implementation, will provide all documentation for the implementation, testing, and configuration to the DOW.

Support and Maintenance

The selected vendor will provide functional and technical support including software version updates and upgrades to the hosted solution.

The following shall apply for the life of the contract, including but not limited to:

- Secure VPN Access to CC&B, Reporting Tool, and Cloud Services;

- All major and minor updates/ upgrades, including but not limited to hotfixes and maintenance releases, must be provided periodically and installed by the vendor at no additional costs to the DOW throughout the term of the contract, provided maintenance is up to date;
- Resolving and designing fixes for issues in the functionality;
- Monitoring performance of the system;
- Monitoring daily batch processing and helping with data cleanup.
- Assist with issues for invalid entries.
- Assists with the errors arising from customized reports.
- DOW will not incur any additional fees as a result of the vendor changing platforms that support the proposed solution;
- Support for as needed bill factor changes for Water Rates; and
- Support for all Accounting and Meter Reads Update.

The selected vendor shall supply information about expected response times to technical inquiries, and shall describe the process by which software patches and upgrades are distributed and applied including a description of how this process works when a client purchases and applies customizations to their system.

Note that if customization is required, it must not interfere with software updates/upgrades/versions.

2.3 TERM OF CONTRACT

The contract shall be for a multi-term of five (5) years and is intended to begin approximately on September/October, 2018 and ends on August/September, 2023. See HAR sec. 3-122-149 on multi-term contracts.

The contractual obligation of both parties in each fiscal period succeeding the first is subject to the appropriation and availability of funds. The contract will be cancelled if funds are not appropriated or otherwise made available to support continuation of performance in any fiscal year succeeding the initial fiscal year. In this event, the contract shall automatically terminate at the end of the fiscal year for which funds have been appropriated. In the event the contract is cancelled because funds are not appropriated or otherwise made available to support the continuation of the contract after the first fiscal year, no breach of contract shall be deemed to have occurred as a result of this termination, which shall be considered as a normal termination of the contract, provided that the contractor shall be reimbursed for its unamortized, reasonably incurred, nonrecurring costs. The Board will notify the Contractor on a timely basis regarding the availability of funds for the continuation of the contract for each succeeding year.

Unless terminated, the Contractor and the DOW may extend the term of the contract for twelve (12) additional months or portions thereof (“Option Term”) without the necessity of re-soliciting, upon mutual agreement in writing at least sixty (60) days prior to the expiration of the contract. - 3.6.3 All such requests for confidentiality and nondisclosure of information shall be subject to HAR §3-122-58 and the Uniform Information Practices Act, Hawai'i Revised Statutes. 3.13 MODIFICATION PRIOR TO SUBMITTAL DEADLINE OR WITHDRAWAL OF OFFERS

3.14.4 If discussions are not held, or if the BAFOs upon which award will be made have been received, mistakes shall be corrected to the intended correct offer whenever the mistake and the intended correct offer are clearly evident on the face of the proposal, in which event the proposal may not be withdrawn.

3.14.5 If discussions are not held, or if the BAFOs upon which award will be made have been received, an Offeror alleging a material mistake of fact which makes a proposal non-responsive may be permitted to withdraw the proposal if: the mistake is clearly evident on the face of the proposal but the intended correct offer is not; or the Offeror submits evidence which clearly and convincingly demonstrates that a mistake was made.

Technical irregularities are matters of form rather than substance evident from the proposal document, or insignificant mistakes that can be waived or corrected without prejudice to other Offerors; that is, when there is no effect on price, quality, or quantity. If discussions are not held or if BAFOs upon which award will be made have been received, the Procurement Officer may waive such irregularities or allow an Offeror to correct them if either is in the best interest of the DOW. Examples include the failure of an Offeror to: return the number of signed proposals required by the request for proposals; sign the proposal, but only if the unsigned proposal is accompanied by other material indicating the Offeror's intent to be bound; or to acknowledge receipt of an addendum to the RFP, but only if it is clear from the proposal that the Offeror received the addendum and intended to be bound by its terms; or the addendum involved had no effect on price, quality, or quantity.

Key criteria will include: customer portfolio, references, years in business, financial viability, line of business focus (software, custom applications or services), industry focus, etc.

B. Cloud Hosting Proposal and Vendors Ability to meet the DOW’s Requirements (25 Points)

In the event the Board determines, in its sole and absolute discretion, that it is necessary to purchase the coverages herein required of the Contractor, and which the Contractor has failed to secure, the Contractor shall reimburse the Board for the expenditure of such funds.
